Paper 2 AS Level Structured Questions

**October/November 2019**

MARK SCHEME

Maximum Mark: 60

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2019 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

| Question  | Answer   | Marks     |
|-----------|--|-----------|
| 2(a)      | (work done =) force $\times$ distance <u>moved</u> in direction of force   | <b>B1</b> |
| 2(b)(i)   | 1. acceleration = gradient <b>or</b> $a = (v - u) / t$ <b>or</b> $a = \Delta v / t$  | <b>C1</b> |
|           | e.g. $a = 2.4 / 3.0$<br>$= 0.80 \text{ m s}^{-2}$  | <b>A1</b> |
|           | 2. tension in cable = $(13.0 + 2.0) \times 10^3$   | <b>C1</b> |
|           | work done = $15 \times 10^3 \times (3.0 \times 2.4)$<br>$= 1.1 \times 10^5 \text{ J}$  | <b>A1</b> |
| 2(b)(ii)  | power = $Fv$   | <b>C1</b> |
|           | $v = 2.0 \text{ (ms}^{-1}\text{)}$   | <b>C1</b> |
|           | input power = $(1.6 \times 10^4 \times 2.0) / 0.67$<br>$= 4.8 \times 10^4 \text{ W}$   | <b>A1</b> |
| 2(b)(iii) | work is done against friction so (increase in) GPE is less (than work done by motor)<br><b>or</b><br>energy is lost or transferred or converted to heat/thermal energy due to friction or resistance force<br><b>or</b><br>work is done lifting the cable so GPE is less | <b>A1</b> |
